Surviving underground – guided bunker tour
Built in central Lucerne in the 1970s, Sonnenberg was one of the world’s largest civilian bunkers. Had it ever been needed, two motorway tunnels would have been transformed into a bunker with enough room for 20,000 beds and hundreds of toilet cabins and washbasins. These are accompanied by oblong cheese and bread, and traditional Lucerne Bärentalp pear pastry with the dessert wine. Cold platters of meat are also available by prior arrangement. The tour with tasting takes around 1.5 to 2 hours.

City Thriller Interactive Crime Game
As members of a special commission, the participants have to solve a spectacular crime. Evidence is gathered, suspects interrogated and, in the end, the perpetrator handcuffed. But be warned: not every suspect is telling the truth. City Thriller is an interactive crime game for all fans of the genre; the ultimate thrill for all those who have always wanted to slip into the role of Sherlock Holmes and his like.

Teamwork – Making and Enjoying
Cooking and eating together offers a great opportunity for getting to know each other – especially when preparing a meal in the kitchen workshop that depends on everyone joining in. Even more teamwork is called for during the convivial lunch served directly from the stove, the creative team meeting in the afternoon with a coffee break attended by a barista, and the cocktail workshop for the ensuing aperitif. Every place in the unique restaurant can be turned into a mini workshop for other activities tailored to the team.

Vineyard Tour and Tasting
In Kastanienbaum near Lucerne, winemaker Ottiger offers tours and tastings for groups in its beautifully located lakeside estate. Participants are welcomed with a glass of sparkling wine and introduced to the workings of a wine estate. This is followed by a tasting session involving two or three white wines, two or three red wines and a dessert wine. These are accompanied by oblong cheese and bread, and traditional Lucerne Bärentalp pear pastry with the dessert wine. Cold platters of meat are also available by prior arrangement. The tour with tasting takes around 1.5 to 2 hours.
City Tour of Lucerne
Join us as we visit world-famous sights such as the Chapel Bridge with the octagonal Water Tower, the Jesuit Church and the KKL Luzern Culture and Convention Centre. On the tour you will learn important and humorous facts about the history of Lucerne and the everyday life of its residents. You will discover hidden alleys, visit town squares teeming with activity and even catch a glimpse of the city’s “crown”, the Musegg Wall. Experience renowned sights and many fascinating aspects. Lucerne looks forward to seeing you!

Lucerne with brains
You are the guide on this city tour. After a joint tour of Lucerne you can demonstrate your newly acquired knowledge of the city. You recognise the Chapel Bridge, Water Tower, Dance of Death and KKL Luzern Culture and Convention Centre, and you can find the master baker’s family tree. A typical gift from Lucerne is in store for the three cleverest visitors. The tour is also suitable for children.

Journey back to the Middle Ages
Experience Lucerne at the time it became a city, as bells determined the daily routine and craftsmen carried out their work in the alleys. Fortified towers, walls and bridges were built, while mercenaries and merchants characterised the townscape. In historic garb, we will take you on a journey back to the Middle Ages so you can smell, see, hear and feel the past.

Lucerne’s fortifications – the Musegg Wall
At one time, 30 towers linked by stone fortifications protected our city. Climb the Musegg and hear stories about the construction of the wall, now a monument of national importance. Enjoy the panorama and observe the mystical movement of the clock pendulum in the Zyt Tower. Built more than 600 years ago, covered wooden defensive corridors still characterise Lucerne’s image today and testify to an eventful, turbulent period.

Out and About with the Shepherd

Discovering how life used to be. Defying wind and weather and standing at the edge of a mist-shrouded field, observing sheep grazing contentedly:防风挡雨，站在雾气缭绕的田野中，观察羊群和谐地吃草。

They are then helped to harness the dogs to the sleds. At last the musher gives the order: “Go, go!” All one hears is the panting of the dogs and the scraping of the sleds. Accompanied by his dog and his domiky, he moves about the region with a huge flock between November and March.

The rotating cabins of the TITLIS ROTAIR aerial cableway bring visitors to the upper terminus. The glittering, blue glacier grotto leads deep down into the glacier’s fascinating interior. You need a good head for heights to walk across Europe’s highest-situated suspension bridge, the TITLIS Cliff Walk. In summer, the ice Flyer chair lift to the glacier park, the snow tubes and other snow toys offer fun for all ages.

Igloo Experience
The building of structurally correct igloos promotes team spirit and is an unforgettable snow-oriented experience. The activity begins with a snowshoe tramp to the site where the igloos are to be erected under professional instruction. Every participant has to contribute to the effort, for the task calls for a degree of skill, coordination and stamina. It is a great feeling to be able to admire one’s own self-built igloo at the end of the activity.

- min. 6 persons
- CHF 75 per person

Llama Trekking Through Giswil
A very special adventure awaits where llama trekking is involved. Once participants have got to know the animals, the group walks with them through the village of Giswil. There follows a break for lunch by an open fire featuring grilled meats or a fondue. Llamas are very intelligent and inquisitive and they learn fast. On offer are half- and full-day tours, as well as tours tailored to individual requirements: the possibilities are endless.

FACTORY VISITS

Here are two examples of engaging factory visits in the Lucerne – Lake Lucerne Region. More examples may be found under www.luzern.com/factoryvisits.

Gotthard Tunnel Experience

A visit in Erstfeld to the world’s longest railway tunnel is a chance to be immersed in the fascinating world of tunnel building. A large inspection window allows visitors to observe the passenger trains (which can travel at up to 200 km/h) and goods trains passing through the tunnel, while the exhibition and the professional guide explain how this “project of the century” was realised. Prior reservation for guided tours is essential.
