

Covid-19: Lucerne – Lake Lucerne Region

Welcome to the Lucerne – Lake Lucerne Region

We bid you a warm welcome. Here is some useful information regarding Covid-19 and how it impacts your arrival and your stay with us.

Coronavirus: Entering Switzerland

The following restrictions currently apply for entering Switzerland:

- There is no quarantine obligation for people entering Switzerland.
- All travellers are required to fill out an online form ([Passenger Locator Form, SwissPLF](#)).
- Testing is not required for vaccinated or recovered travellers who can present a Covid certificate or other valid proof of vaccination or recovery
- Travellers aged over 16 entering Switzerland who have not been vaccinated or have not recovered from Covid-19 have to present a negative test result (PCR or antigen). They will then have to be tested again in Switzerland after four to seven days. This test will be chargeable.

These requirements are subject to change. Please ensure you know what the latest requirements are before setting off. Information may also be found here: www.bag.admin.ch/entry

➤ **To check what rules apply to your own particular situation when entering Switzerland, we recommend the [interactive travel check tool](#) of the Federal Office of Public Health (FOPH).**

Measures to combat the coronavirus

The Lucerne-Lake Lucerne Region has high standards in terms of hygiene and safety. Continuously updated information on Covid-19 can be found at www.luzern.com/coronavirus.

Covid vaccination certificates issued in foreign countries

- The “EU Digital COVID Certificate” and the British NHS COVID Pass are also recognised in Switzerland
- Visitors from countries outside die EU/EFTA/Schengen area can receive a Swiss certificate of vaccination if they can prove that they received the required number of doses of a vaccine approved by the [European Medicines Agency \(EMA\)](#) (currently Pfizer/BioNTech, Moderna, Johnson & Johnson/Janssen and AstraZeneca) or have proof showing that they have been infected with the coronavirus in the last 6 months and are cured.

➤ **To get the certificate please fill out the form [on this website](#) to get the certificate. You need the following documents and information:**

- Valid identity card (passport or ID)
- Proof of complete vaccination abroad or a positive molecular biological test result (e.g., PCR test) from a foreign laboratory
- Proof of entering Switzerland (e.g., hotel reservation, flight or train ticket).

Duration: Please note that it may take up to 5 days to get the Swiss Covid certificate.

Costs: If you are a Swiss citizen or have another official residence permit or permanent domicile in Switzerland, the procedure is free of charge. If you do not meet any of these requirements (for example if you are a tourist), the procedure costs CHF 30.

- Visitors who do not meet the above requirements – including those who are vaccinated with the Sinopharm / BBIBP or Sinovac Biotech vaccine - must be tested every three days at a regional test centre in order to receive a valid certificate.
- As of the end of November 2021, all WHO approved vaccines (including the Sinopharm / BBIBP and Sinovac Biotech vaccine) will allow access to a Swiss Covid certificate which will be valid for 30 days.
